

# SUSTAINABLE DEVELOPMENT GOALS

[www.agenda2030.lu](http://www.agenda2030.lu)

# HOW CAN I BE A PART OF THE SOLUTION?

1. Save electricity by plugging appliances into a power strip and turning them off completely when not in use, including your computer. Privilege the use of renewable energy sources.
  2. Eat less meat, poultry, and fish. More resources are used to produce meat than plants. Drink water from the tap and not from plastic bottles.
  3. Recycling paper, plastic, glass & aluminium keeps landfills from growing. Try composting: composting your kitchen scraps and food waste can reduce the effects of climate change while recycling nutrients. Buy products in minimal packaging and reduce waste by buying in a responsible manner.
  4. Shop local. Supporting neighborhood businesses keeps people employed and helps prevent trucks from driving far distances.
  5. Bike, walk or take public transport. Save the car trips for when you've got a big group.
  6. Bring your own bag when you shop. Decline plastic bags and start carrying your own reusable totes.
  7. Women earn 10 to 30 per cent less than men for the same work. Pay inequality persists everywhere. Voice your support for and require equal pay for equal work.
8. Do your research and buy only from companies that respect the environmental and social sustainability standards.
  9. Speak up! Ask your local and national authorities to engage in initiatives that don't harm people or the planet.
  10. Don't just like, do share and participate! If you know an interesting project, share it to make it known for all interested people, in the database [www.aktioun-nohaltgekeet.lu](http://www.aktioun-nohaltgekeet.lu).
